And What Can You Do?

Vote For All of Your Republican Candidates and Actively Participate!

The Key Issues:

1. The Growth and Price of Socialism

- a) If the Republicans fail to maintain the majority in both the US House and Senate as well as the PA Governor's races, it may very well result in our Republican Party not having any real political power to preserve America's sovereignty, a conservative US Supreme Court, a strong military, and of course this country's founding principles.
- b) If the Republicans fail to win, what will result unfortunately will be the firm establishment of the Democrat-Progressive political party's agenda which will institute a Socialist economic system, a borderless nation, and a weak military which is subservient to a "One World" form of governance.
- c) A Democrat-Progressive Party will continue its interrupted transformation of a borderless country that no longer can be viewed as a sovereign nation. America becomes a country that redistributes its individual citizens' wealth and property as well as the corporations in which these individuals are invested. When the nation loses its sovereignty, it loses its national identity, culture, and history.
- d) The Progressive agenda is really based on the removal of the Constitution's "First Bill of Rights" and replace them with their own "Second Bill of Rights" which engender its leanings regarding social injustice and income redistribution. The Socialistic Agenda based on FDR's Second Bill of Rights promotes power in the hands of the government rather than the governed. Very importantly, one's ability to enjoy certain rights and basic freedoms will erode and attacks on religion, the American culture and history, and conservative viewpoints will reach a crescendo pitch.
- e) Progressivism promotes Socialism which is a step towards Communism: i.e. a totalitarian style of government control. Progressivism's goal of income equality means that eventually everyone will work to serve the Socialist State. Everyone will be told when they will and where to work; not unlike a system of slavery. Because there is no competition, there is no incentive to exceed or have individual creativeness.

American socialism, as with socialism in several other countries, has its roots in Marxist ideology. Many of its tactics are similar to the Russian revolution such as class division, deception, character assassination, warrantless arrests, confiscation of property, and misinformation.

2. National Security

This is the federal government responsibility to provide:

- a) a strong national defense via its military and
- b) the nation's security of its borders and other entry points used by foreigners for the purpose of traveling, immigration, asylum seeking, education, and business via the federal law and enforcement - U.S. Customs and Border Protection (CBP) Agency

3. Economic Systems and Prosperity

The Progressive strategies include the replacement of the American established capitalistic economic system with a socialistic-Marxist "Utopian" one. Socialistic economic approaches have been attempted through millennia time periods and have failed to become truly self-sustaining. Without an economic engine it could not grow the economy and create prosperity.

How are we at risk of losing our American Constitutional Republic?

1. It has long been the goal of the Progressive Movement in the US to Transform America into a Socialist – Marxist country. It has been a well-thought-out and executed plan which, was based on years of research into the America's Constitution and its abundance of liberties and fairness of treatment to all individuals that provided many opportunities for its enemies to exploit it for their own advancements. Additionally, this country's legislative laws coupled with the judicial interpretations of its laws over the years have gradually eroded our individual rights as a free citizen. Instead, Progressives have endeavored to promote power over the individual and over this country's sovereignty. This Progressive thirst for power has grown tremendously and has been taking the form of:
 - i. a totalitarian, large scale, bureaucratic government which dictates exactly how its citizens are to live,
 - ii. a movement whose strategy deploys subversive tactics utilizing both external and internal forces to ultimately take total control of the American nation,
 - iii. a Marxist mimicked movement that intends to be able to outgrow in size its opposition party, i.e. the Republicans, so that it will never lose another national election in either the Executive or Legislative branches via educational indoctrination, an immigration invasion, and voting fraud,
2. Unfortunately, there has been denial or inability to detect by many powerful political individuals and citizens for years that this Progressive Tide was both real and growing. There has also been a failure to deploy an effective strategy and plan to mitigate the treat that was developing before our very eyes.

The bright spot in all of this is that America had enough intelligent and rational citizens who understood the existence and extent of this threat. These freedom seeking individuals decided to side with Donald J. Trump to prevent this large-scale, never ending assault on this great nation and its traditional values. These staunch individuals have the highest regard for religion, freedom of speech, self-protection, states' rights, and freedom from unlawful searches and seizures. They have gained keen insights into America's corrupt "Deep State" that exists inside and outside of government with its subversive tactics to undermine this great Republic. A nation which William Bennett called the Last Best Hope!
